DETAILED ACTION

1. This office action is in response to applicant's arguments filed on November 6, 2008.
2. Claims 1-12 are pending. Claims 8,9 and 12 have been withdrawn from consideration due to a non-elected group.
3. The objection to the specification is withdrawn in view of applicant's submission of a new abstract.
4. Claims 1-7,10 and 11 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Hoyer et al. (US 4,622,390) in view of Tzikas (WO 00/06652) for the reasons set forth in the previous office action.
5. Claims 1-7,10 and 11 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Eichorn et al. (WO 03/080739) for the reasons set forth in the previous office action.

Response to Arguments

6. Applicant's arguments filed regarding Hoyer et al. (US 4,622,390) in view of Tzikas (WO 00/06652) and Eichorn et al. (WO 03/080739) have been fully considered

but they are not persuasive. The applicant argues that the dyes taught in Tzikas et al. are red and the dyes taught in Hoyer et al. are blue and that not every mixture of arbitrarily selected dyes of different colors can be successfully applied in textile dyeing. The examiner respectfully argues that it is well known in the dyeing art to combine dyes of different colors in di or trichromatic mixtures to dye textiles. Both Hoyer et al. and Tzikas et al. are directed to printing similar hydroxyl containing and nitrogen containing fiber materials for the benefits of high degrees of fixation (column 8, lines 30-60 and column 9, lines 10-30, respectively). This is further supported by Eichorn et al. who demonstrate combining dyes of formulas (1) and (2) in a single mixture (abstract, paragraphs 004-0062). Applicant's declaration under rule 132 filed on November 6, 2008 has been considered but is not sufficient to overcome the rejections of record because the declaration is not commensurate in scope with the instant claims. The declaration shows unexpectedly superior acid hydrolysis properties for only a combination of two species of dyes at a single concentration range while the claims are directed to numerous dye combinations at all percentage ranges. Furthermore the prior art teach numerous species of the dyes of formulas (1) and (2).

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
